

# TIMING SOFTWARE

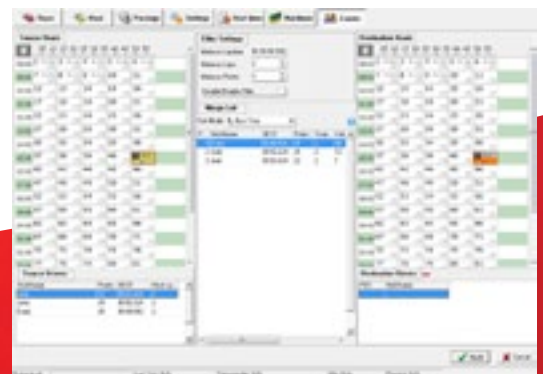

## Main functionalities

**Arrive & drive**  
**Pay & go**  
**Events**  
**Grand Prix**  
**Live timing on TVs and scoreboards**  
**Live timing on your website** (additional component needed)  
**Race history on Facebook** (additional component needed)  
**Professional printouts**  
**Automatic personalized emails after the race**  
**Backup timing system**

The **SMS-Timing karting timing software** is very flexible. In addition to accurate timing, you can set up different kinds of races. To facilitate its use, it is even possible to correct mistakes manually after, and even during the race. This software is compatible with all known hardware worldwide: transponders, decoders, scoreboards, lights, remote kart control, etc.

## MORE POSSIBILITIES WITH...

- Point of sale to link races with your membership system and sales
- HDTV display for modern live timing
- Virtual garage for your go-kart follow-up
- Office to query driver's race information in your database
